Economical Heating with
up to 86.6% AFUE

Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A

leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

Comfort™ 80 oil furnaces continue the Carrier® story with money-saving efficiency and built-in durability that is tested well beyond industry standards.

Leaders in Technology

Model OBM
Multi-Poise
(Riello Burner)

The combustion/heat exchanger combination is a Carrier exclusive. This unique component quickly and efficiently converts oil to heat so your family can relax in the soothing warmth of home.

What Efficiency Means to You

You can compare efficiencies of different oil furnaces by checking the AFUE (Annual Fuel Utilization Efficiency) ratings. Using these ratings is a lot like miles per gallon for your car – the higher the number, the more efficient the product and the greater potential for savings. Comfort 80 oil furnaces deliver up to 86.6% AFUE to potentially reduce your energy costs.

1 High Heating Performance

For your peace of mind, Carrier® oil furnaces are built with a solid core of high-quality components. The high performance burner on these furnaces is one of the keys to delivering quiet operation and optimal fuel efficiency that you can enjoy, winter after winter.

2 Quiet Operation

Carrier® furnaces are designed for quiet comfort and the Comfort™ 80 oil furnaces are no exception. Our unique combustion silencer system helps isolate noise, allowing you to enjoy your comfort. What little sound this unit does make is further isolated by our sturdy steel casing and door and insulated cabinet.

Uncompromising Quality

Industry leadership for more than 100 years doesn't happen by accident. Carrier has maintained its position and reputation through diligent, uncompromising quality control at every stage of a product's life – from concept to completion. Once our product is installed at your home, you can be confident that durable construction and built-in reliability features ensure your comfort for years to come.

Carrier makes your comfort the highest priority. That's why we have one of the most extensive product research and development facilities in the world. Within each step of the process, from design through finished products, we test each and every model beyond the industry-standard requirements. In fact, Carrier engineers test the reliability of the heat exchangers to over 200,000 cycles. That's more than six times the industry's standard of 30,000 cycles.

The Models OBM and CBM multi-poise are designed for versatility. With the ability to install in upflow, downflow and horizontal right and left applications, this proven performer is an excellent fit for virtually any home.

Specifically designed for low ceiling installations, the Models OBL and CBL low-boys are perfect for homeowners whose space is at a premium.

Limited Warranty

To the original owner, Carrier Comfort 80 oil furnaces are covered by a 10-year parts and lifetime heat exchanger limited warranty upon timely registration. The limited warranty period is five years for parts and twenty years for the heat exchanger if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty period. See warranty certificate at carrier.com for complete details and restrictions. Be sure to ask your Carrier dealer about optional labor warranties.

Carrier® Systems for Unmatched Performance in Every Season

Willis Carrier's meticulous attention to quality and detail led to a major culture shift in the way we live indoors. More than a century later, Carrier Corporation operates with a unique willingness to develop new technology, the confidence to revise proven designs and the ability to deliver results with every new installation.

Part of that equation is our nationwide network of experts you can turn to for all of your indoor comfort needs. Your local Carrier dealer is well equipped to evaluate your home – everything from size, window placement, ductwork, venting and other structural specifics – and create a customized system designed around your lifestyle. So when it's time to make a choice for your family's comfort, make the best decision you'll ever make – Carrier – and let the experts do the rest.

The Total Indoor Comfort System

Air Conditioner provides reliable, high-efficiency cooling for long-lasting comfort and energy savings.

Oil Furnace provides reliable, energy-efficient heating for long-lasting comfort and energy savings.

Evaporator Coil is matched with the proper outdoor unit to provide top heating and cooling efficiency and years of reliable service.

Air Cleaner improves air quality by removing harmful and irritating airborne pollutants in your home.

Ventilator combines fresh outdoor air with conditioned indoor air for improved air quality and maximum efficiency – great for today's tightly constructed home.

Humidifier replenishes moisture to dry air.

Zoning sets different temperatures for up to eight different areas of your home for truly customized comfort and enhanced utility savings.

UV Lamp inhibits the growth of contaminants on the indoor coil, leaving your home with cleaner, fresher indoor air.

Programmable Thermostat allows precise temperature control along with programmable features to further customize your comfort.
