Performance™
SERIES

As an ENERGY STAR® partner, Carrier Corporation has determined that the Performance 86 boiler meets ENERGY STAR guidelines for energy efficiency.

Oil Boilers with up to 86.5% AFUE

Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

The Performance™ 86 boilers continue the Carrier story with reliable heating and energy-saving comfort. It's the ideal source for radiant heat systems.

Leaders in Technology

1 Safe, Reliable Comfort Control

Our aquastat control is the brains of the boiler, controlling operation of key components, including the burner, circulator and domestic coil. It also monitors water temperature to ensure safe, reliable operation.

2 Easy Access

For dealer convenience during installation or maintenance, the swing burner door provides easy access to the burner. That means your HVAC contractor can get in and out quicker and you can enjoy the heat sooner!

Uncompromising Quality

Industry leadership for more than 100 years doesn't happen by accident. Carrier has maintained its position and reputation through diligent, uncompromising quality control at every stage of a product's life – from concept to completion. Once our product is installed at your home, you can be confident that durable construction and built-in reliability features ensure your comfort for years to come.

What Efficiency Means to You

You can compare efficiencies of different boilers by checking the AFUE (Annual Fuel Utilization Efficiency) ratings. Using these ratings is a lot like miles per gallon for your car – the higher the number, the more efficient the product and the greater potential for savings. The Performance 86 boilers deliver up to 86.5% AFUE to potentially reduce your energy costs.

Limited Warranty

To the original owner, the Carrier Performance 86 boilers are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty period. See warranty certificate at carrier.com for complete details and restrictions. Be sure to ask your Carrier dealer about optional labor warranties.
